“ Renita, myself, Sonia Cortez, and other court administrators would attend the TACA conventions and professional development classes annually. We would have so much fun. Really, we probably shouldn't have been allowed to sit together. She was such a fun lady and being around her just made things fun and light. I admired her dedication to the judges that she served, her professionalism, and her willingness to be a point of contact for new court admins. Just hearing her voice on the phone would make me smile. Although I retired, I have such fond memories of Renita that I will hold in my heart until I see her again. My deepest condolences to her family, who she loved so unconditionally.
